

MILITARY MASS NOTIFICATION **REDEFINED**

Protecting Military Personnel and Facilities
with Secure, Trusted, Real-Time Emergency Audio Announcements

TextSpeak has redefined delivery of emergency audio notifications over secure networks. As the industry's only solution, our earBridge IP amplifier system uses plain text messaging to generate audio announcements instantly over internal networks. As a trusted endpoint, the amplifiers can generate a clear high-definition voice announcement with authenticated messaging, without exposing networks to the outside world, or running vendor applications.

Command and control centers can simply send text messages from internal programs to our trusted endpoints. Deliver general announcements or mass notification messages over wide areas in an instant with speed and clarity.

earBridge Ethernet Amplifier

Low cost standalone text to speech solution with secure Ethernet connectivity converts text to speech and can play out pre-recorded WAV files.

Emergency button input feature included. Line output to existing PA systems or connect directly to speakers from the 25 Watt output. Simple to use, easy to install and cost effective.

TextSpeak NOTIFY! Complete Scalable Emergency Notification System Expands Secure and Trusted Hardware Voice Announcement End Points

It is possible to install a powerful and effective emergency notification solution, either as standalone or extension of an existing system just with the earBridge hardware.

The earBridge Amplifiers can also be part of TextSpeak NOTIFY!, a wider system that includes access from smartphones, and feeds text to voice phone calls, text messages and additional earBridge amplifiers.

The military can bridge to and from their SECURE network to the outside world and use TextSpeak NOTIFY! cloud and software based services.

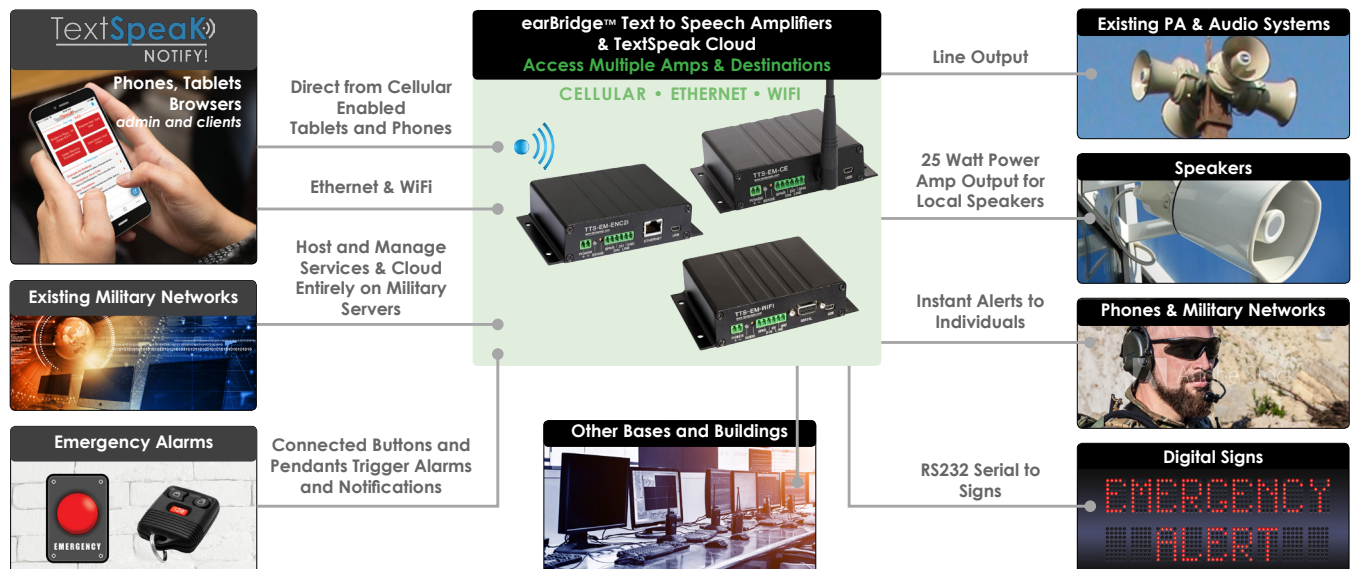

Optional Mobile Application Extension

Connect phones, tablets, browsers with the TextSpeak NOTIFY! app to the earBridge text to speech amplifiers. SMS text alerts are converted to high-definition speech for facility announcements. TextSpeak NOTIFY! mobile app can trigger a set of instant application announcements.

Pendant Events—Buttons and Pendants

Emergency pendants can trigger instant announcements—save precious seconds at the push of a button.

MILITARY FACILITY'S FIRST TEXT TO SPEECH SOLUTION

Complete System Installs in Hours—Includes Everything Completely Trusted and Authenticated On Your Network

Real-time Audio Paging • Suite of Mobile Apps • Group Mass Notification Push Button Alerts • Connectivity to Other Bases • Off-Premise Announcements
